GUB Buncher

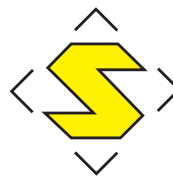

Automatically applies the

ElastiTag[®]

**Bundle & Tag Asparagus
and other Produce!**

The **STRAUSS GUB Buncher** bundles asparagus and other produce by means of an **ElastiTag®** and a rubber band.

The **GUB Buncher** can be used as a stand-alone machine or in combination with our **STRAUSS** weighing and grading lines.

The packaging units of your produce are placed directly into the customized cups of the infeed belt and subsequently pass through the bunching unit. There are two special binding machines with grab arms on each side of the GUB Buncher. The binding machine at the upper side of the bunch of

produce applies the **ElastiTag®** and the one on the lower side applies the rubber band. The grab arms seize the loop of the **ElastiTag®** and the other common rubber band, stretch them and apply them synchronously to the respective side of the packaging units. Afterwards the bundled units can be taken from the removal belt and transferred to the next step of treatment.

Technical data:

Bunching material:

ElastiTag® from a spool and rubber band from a tube

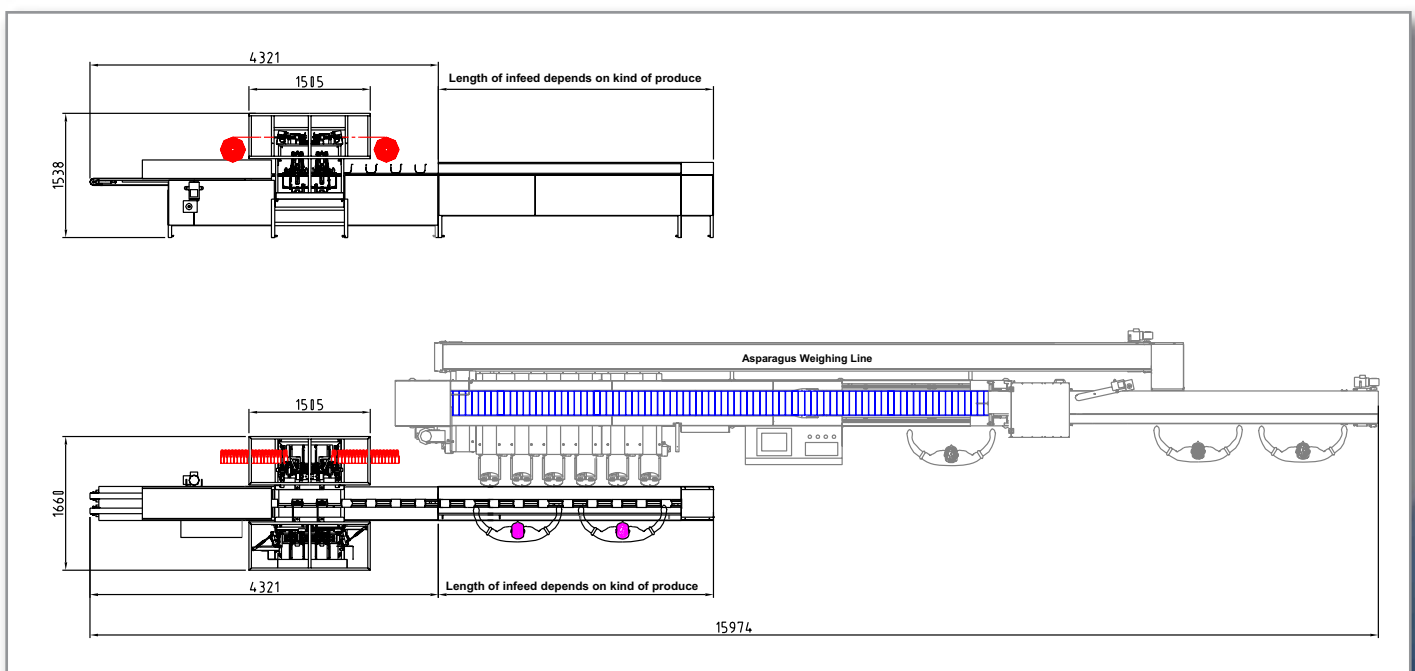

Capacity: GUB 14 (2 binding heads per side) approx. 45-47 units/min.

Air: 1/2" connection
Current: 400 V, 3 P, N, PE/16 A CEE connector
Power consumption: 3 kVA/5 A

Options:

With additional printers the **ElastiTag®** can be printed with your company logo as well as certain produce information.

The machines are subject to technical modifications.
